

Camera preview (CSI)

Camera preview (CSI)

1. Compile the function package
2. Start the camera
3. Preview the screen
4. Main code

1. Compile the function package

```
cd ~/yahboom_ws
```

```
colcon build
```

```
source install/setup.bash
```

2. Start the camera

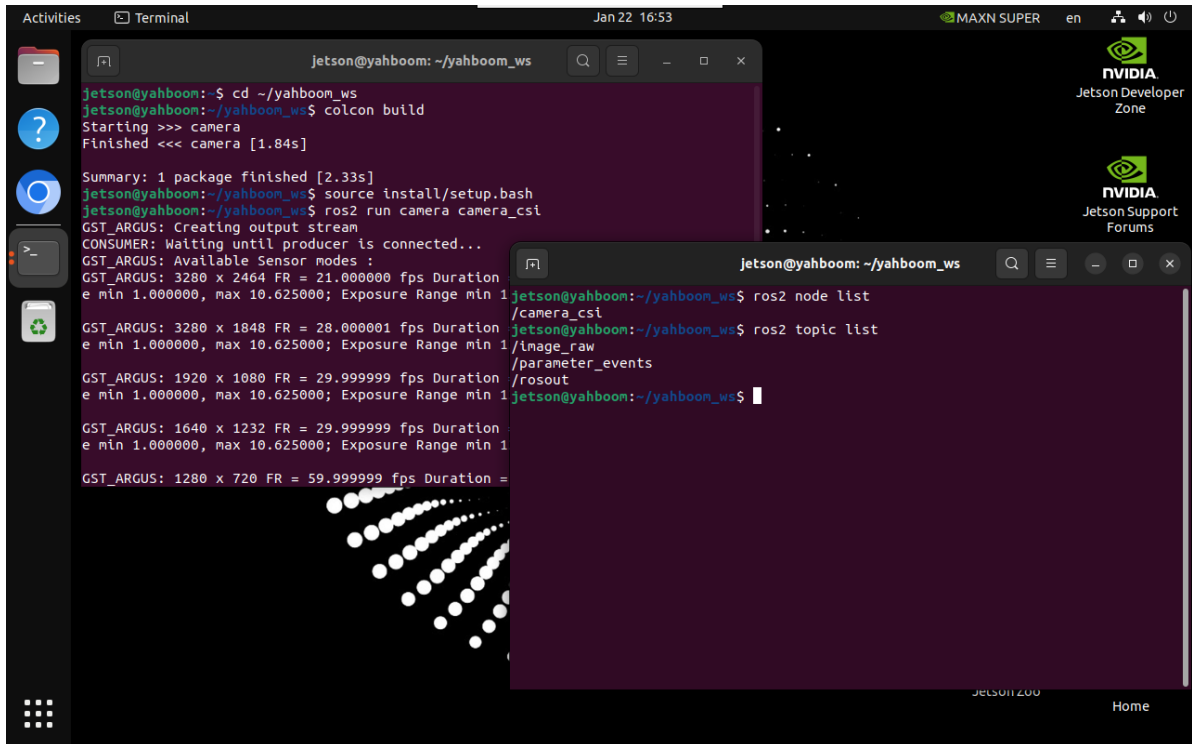

Start the camera

```
ros2 run camera camera_csi
```

View nodes and topics

```
ros2 node list
```

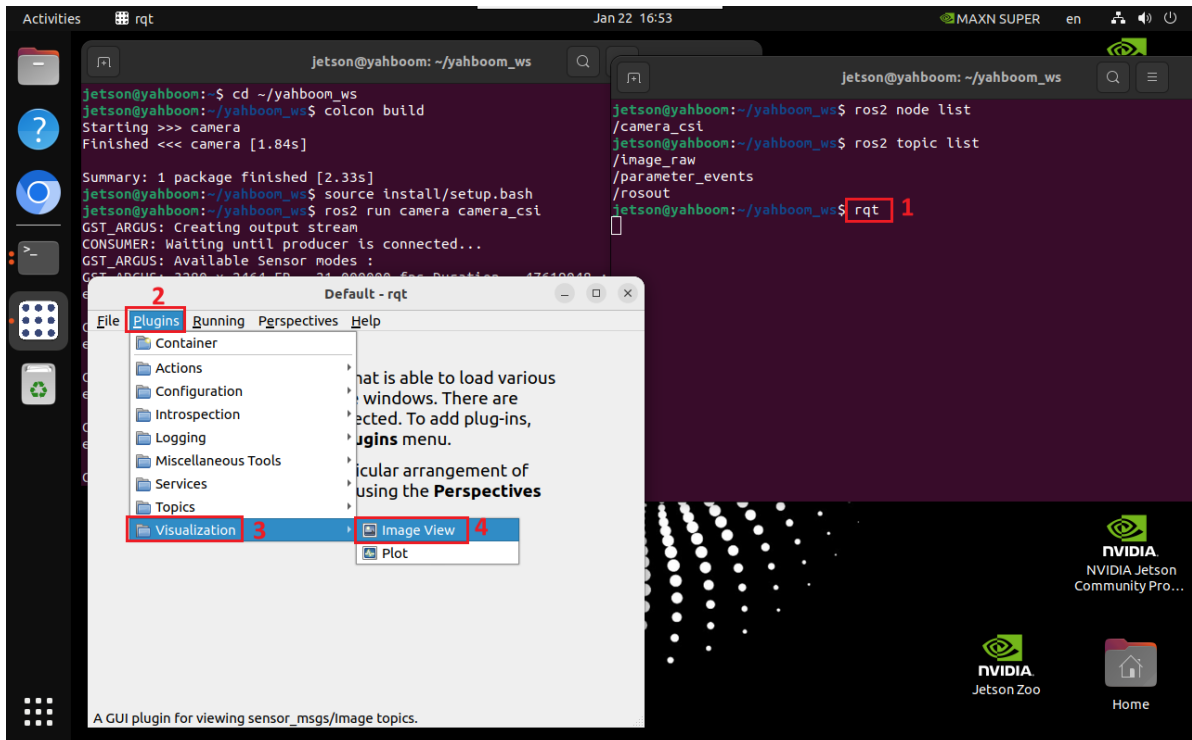

ros2 topic list

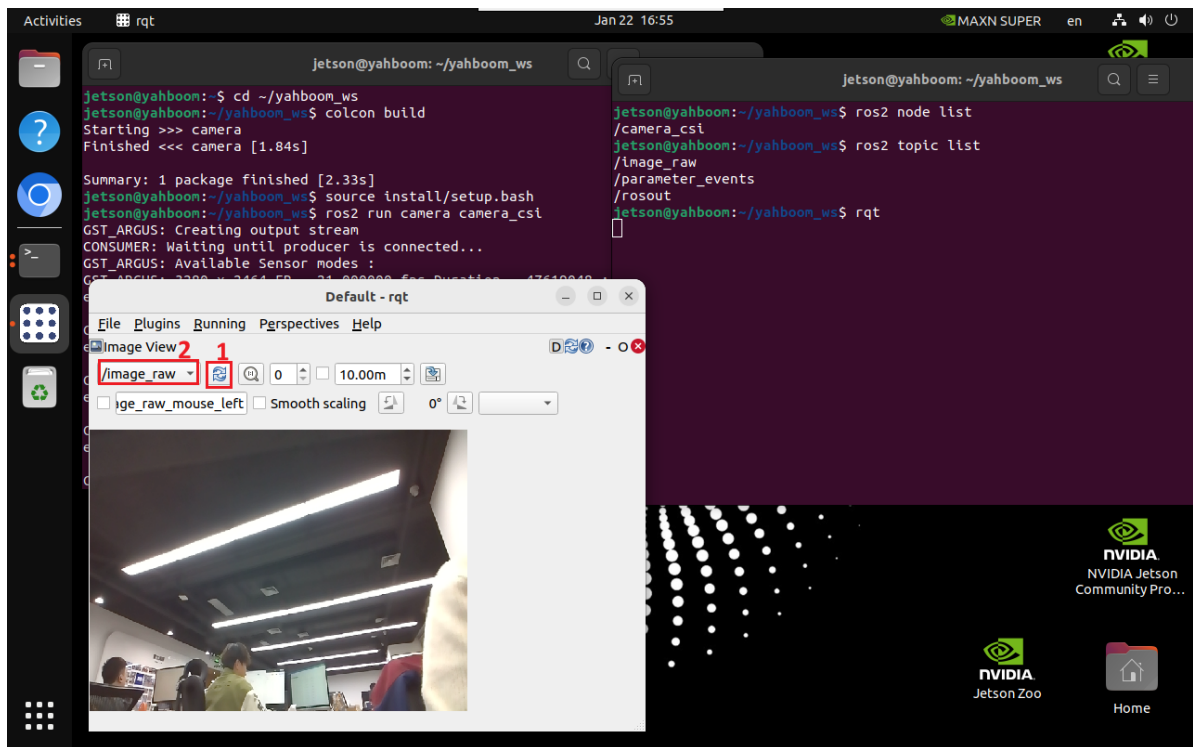

3. Preview the screen

Use rqt to view the screen topic corresponding to the camera: rqt → Plugins → Visualization → Image View

rqt

4. Main code

```

import rclpy
from rclpy.node import Node
from sensor_msgs.msg import Image
from cv_bridge import CvBridge
import cv2
from jetcam.csi_camera import CSICamera

class CameraNode(Node):
    def __init__(self):
        super().__init__('camera_csi')
        self.publisher = self.create_publisher(Image, 'image_raw', 10)
        self.bridge = CvBridge()

        self.cap = CSICamera(capture_device=0, width=640, height=480)

        self.timer = self.create_timer(0.05, self.timer_callback)

    def timer_callback(self):
        frame = self.cap.read()
        if frame is not None:
            image_msg = self.bridge.cv2_to_imgmsg(frame, encoding="bgr8")
            self.publisher.publish(image_msg)
        else:
            self.get_logger().warn('Failed to capture image')

def main(args=None):
    rclpy.init(args=args)
    node = CameraNode()
    rclpy.spin(node)

    node.cap.release()
    rclpy.shutdown()

```

```
if __name__ == '__main__':  
    main()
```
