Jetpack old system upgraded to Yahboom SUPER factory system

1. Description

This tutorial is mainly provided for users who purchased the Jetson Orin series motherboard before February 7, 2025. Please follow the instructions below.

2. Upgrade method

2.1. Write SUPER boot

Refer to the tutorial [Chapter 2 Jetson basic course: Write SUPER boot] Operation: Completing this tutorial can allow the motherboard to start the Jetpack6.2 system.

2.2. Restore initial image system

Refer to the tutorial [Chapter 2 Jetson basic course: Restore initial image system] Operation: Completing this tutorial can write the SSD to the SUPER (Jetpack6.2) system.

Note: You need to prepare the SSD box in advance

2.3. SSD expansion

Refer to the tutorial [Chapter 2 Jetson basic course: SSD expansion] Operation: Completing this tutorial can allocate the unallocated space of the SSD.
